## V1 PROJECT ACCOUNTING ROLLED OUT ACROSS OFFICE NETWORK

P H Warr plc is a leading provider of property and construction surveying services delivered from a network of offices covering London and Southern England.

**They are a dynamic and diverse organisation and have grown strongly every year since being established in 1992.**

P H Warr plc, a leading provider of tailored property and construction surveying and health and safety services, has selected V1 Project Accounting (V1 PA) as its system of choice to provide effective project management across a network of offices throughout Southern England.

Paula Warburton, Financial Director, explained why V1 PA has been chosen: "We sell time and it is essential that we keep track of every minute so we can ensure all aspects of a project are being charged and billed.

The system will enable us to take a 'holistic' view of our business and provide us with vital management information so that each and every stage of a project is controlled, from the planning stage through to the costing, and right from initial bid to the final invoice."

Because the V1 PA system captures time against work stages accurately, it can provide warnings if too much time is being spent on a job or on a particular stage of a project.

Paula continued: "When we first saw the system, we realised that it was exactly what we had in mind."

When we first saw the system,  
we realised that it was exactly what  
we had in mind.

One of the aspects of V1 PA that appeals to quantity and building surveyors such as P H Warr, lies in the fact that the web-based software removes geographical boundaries. In practice, this means that any member of the 60 strong P H Warr team can login and enter data into the system even if they are on site; the only proviso being an internet connection.

The delivery of the V1 PA system via the internet provides a level of hardware resilience way beyond the capabilities of most found in-house.

Because set up time is minimal, it delivers a quicker ROI and practices can be up and running within a day. There are no complicated upgrades as enhancements are updated automatically over the internet. Paul Sparkes, Product Director commented,

"V1 PA is a proven business efficiency tool that answers many of the challenges being faced by project centric businesses in an increasingly mobile world and we are delighted that P H Warr is implementing it throughout its network of offices."

This case study has been re-issued to reflect new product branding. Note that the product name in the original case study was "Project Minder".
